

In the Abstract:

The text of the abstract as marked below will serve to replace all prior versions of the abstract in the present application:

A method of cooling a feed liquid, for example, a molten fat or oil, ~~is formed into~~
includes forming at least one sheet of flowing particles of the feed liquid and is
~~cooled by~~ directing cryogen at the particles from both sides of the sheet. By this
~~means~~method, a molten liquid such as fat may be spray crystallised.
